Education

De La Salle University

Manila, Philippines

Bachelor of Science in Computer Science Major in Software Technology

February 2026

Thesis : KulTuro: Exploring the use of a role-play based storytelling chatbot for Tagalog language education

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Advanced Software Engineering, Database Systems, Operating Systems, Web Application Development, Software Quality Assurance

Awards : Most Outstanding Thesis Award, Gold

Eduardo M. Cojuangco Jr. Excellence Award for Leadership and Research Innovation

iAcademy

Makati, Philippines

Software Development Strand

June 2021

Skills

Technical:

- Languages: C, C++, C#, Python, JavaScript, Java, SQL, HTML/CSS
- Database: MySQL, MongoDB
- Web Development: React, Bootstrap, Tailwind CSS, Node.js, Blazor
- Tools & Platforms: Git/GitHub, VS Code, Android Studio, Jupyter Notebook, Figma

Soft: Problem-Solving, Team-Collaboration, Time Management, Adaptability, Effective Communication, Growth-oriented, Flexibility, Networking

Experience

INFOTOUCH CORPORATION

Makati City, Philippines

Software Development Intern

September 2025 - November 2025

- Developed full-stack features for Palmeo service management platform, including client registration, search interface with dynamic filtering, and real-time operational dashboards with role-based access control
- Developed an automated booking and billing system implementing pricing calculations for service duration, overtime, and discount rules.
- Integrated Google Maps API for location-based client verification and implemented responsive UI components with cross-module navigation.

Projects

TAGALOG CHATBOT LEARNING APPLICATION : KulTuro

- Developed KulTuro, a role-play storytelling chatbot for learning Tagalog through interactive cultural scenarios. Implemented real-time grammar and vocabulary feedback with adaptive story difficulty.

REAL ESTATE WEBSITE : Padua Realty

- Implemented a real estate web application that allows users to browse property listings, view property details, and contact agents, with an admin dashboard for managing properties, agents, and customer inquiries.

FARMING SIMULATOR : Plants-vs.-Time

- Built a Java farming simulation game using OOP and Swing, implementing crop growth mechanics, resource management, and player progression systems.
